

50+TechBridge | How to build it

Turns "How to run it" into pages you can click · No API · No download

Build recipe

What you are building: five website pages that walk a Pioneer through Lesson 2. Barb's page stays open. ChatGPT opens in a *new tab*. You do not connect OpenAI. You do not embed ChatGPT. You do not put the app in the Apple/Google store for Week 1.

A working copy already lives in this repo: [talk-to-ai/](#) (open [talk-to-ai/index.html](#) in Chrome). Use that as the app, or copy each screen into WordPress. Point "Talk to Barb Now" to that Welcome page — not to a chat widget.

THE ONLY TECHNICAL RULE

The Open ChatGPT button must be a normal link: <https://chatgpt.com>, set to **open in a new tab**. ChatGPT blocks iframes. An API key would turn Barb into a different chatbot and fight the lesson.

BUILD THESE FIVE PAGES (IN ORDER)

#	PAGE NAME / URL	ON THE PAGE	THE ONE BUTTON
0	Welcome /talk-to-ai/	Barb photo (talk-to-ai/barb.png). "This is for you." Four choices. No \$18K / WIOA. Phone how-to beside the screen: "Tap one goal." Tiny footer — no #AGENTIC50 seal as the title.	Each goal goes to page 1.
1	Open the tool /talk-to-ai/open/	Barb photo or name. "A new tab will open. Leave this tab open." Stay logged out. Safety line: no SSN, bank numbers, passwords.	Open ChatGPT → links to https://chatgpt.com (new tab). Second button: I'm in → page 2.
2	Ask /talk-to-ai/ask/	Starter prompt in a box. "Copy this into ChatGPT. Then change it to your letter, trip, recipe, or job task." They type in ChatGPT, not on Barb's page.	Copy the starter prompt. Then: I sent it → page 3.
3	Follow-up /talk-to-ai/follow-up/	Tell them to send, in ChatGPT: "What should I check with a real person?" (or "Make that shorter.")	I checked it → page 4.
4	Save the win /talk-to-ai/win/	Now show the #AGENTIC50 seal. "You are a Digital Pioneer." Link the completion slip PDF and the take-home card.	Open the completion slip (PDF).

IF YOU USE WORDPRESS / ELEMENTOR (LIVE ASK BARB SITE)

1. In Pages → Add New, create five pages with the titles above. Publish them.
2. On each page: **Barb photo** (file: talk-to-ai/barb.png — same portrait as learnmoretechnologies.com/images/barb.png), large type, one main button, and a **how-to phone** next to the screen showing what to tap. Nothing about WIOA.
3. On page 1, add a Button widget. Link = **https://chatgpt.com**. In the link options, turn on **Open in new tab**.
4. On page 4, upload the seal (**forms/facilitator/assets/agentic50-seal.png**) and the two PDFs (completion slip + take-home).
5. Edit the current “Talk to Barb Now” button. Change its link from the chatbot to **/talk-to-ai/** (page 0). Hide Health / Money / Safety as the first topics. Hide \$18K / Book a Call from that landing.
6. Do not add an OpenAI API key, a chat plugin, or an HTML embed of chatgpt.com.

IF YOU USE THIS GITHUB SITE INSTEAD

The five pages are already written in **talk-to-ai/**. After this branch is on the web, open **/talk-to-ai/** on the GitHub Pages site. Until then, on your PC: download the folder, double-click **index.html**, and walk the five screens in Chrome.

HTML FOR THE ONLY SPECIAL BUTTON

Paste into a Custom HTML block on page 1 if the Button widget will not open a new tab:

```
<a href="https://chatgpt.com" target="_blank" rel="noopener noreferrer">Open ChatGPT →</a>
```

DONE WHEN YOU CAN DO THIS ON A PHONE

1. Tap Talk to Barb Now (or open /talk-to-ai/) → pick a goal.
2. Tap Open ChatGPT → chatgpt.com opens in a new tab. Stay logged out is findable.
3. Switch back to Barb. Copy the starter. Paste it in ChatGPT. Send a follow-up.
4. On Save the win, the #AGENTIC50 seal is on screen. The completion slip PDF opens.

Do not build: a Barb chat box that answers questions; a Health & Medications home screen; WIOA / \$18K on Step 1; an iframe of ChatGPT; an OpenAI key “so they don’t have to download” (they never needed a download); renaming the first screen “#AGENTIC50.”

Boards: the app is these five pages plus the printed slip. That is enough to demo in 8 minutes. License later. Do not wait for an App Store listing.
