

Establish Brian McKinney as the global speaker on AgeTech and 50+ AI — funded by government contracts, amplified by AGENTIC50, proven by the ecosystem.

This is a comparison of what exists today against what each platform needs to satisfy grant reviewers, contract procurement officers, conference bookers, and learners — and the sequence to close every gap.

1. Ecosystem — what you have and what it is missing

PLATFORM	WHAT EXISTS NOW	CRITICAL GAP	PRIORITY
learnmoretechnologies.com	Advise / Train / Speak three-service home. \$76T positioning. MBE, WIOA, 347 Pioneers. Barb widget.	Three conflicting price points. Two module lists. No unified offer sheet. No outcomes data on the page.	Fix first
50plustechbridge.com	Free course. Community. Certificate. 6-week cohort. 9 Austin library locations. EN/ES.	Module titles still read phones/Zoom/banking. Not yet "Talk to AI" spine. No fork visible. No paid SKU visible.	Fix Week 1 now
brianmckinney.com	Speaker one-sheet site. Three keynote tracks. 347 Pioneers. "The book" mentioned. Clean design.	Photo placeholder visible. Floor price not set. No booking link to a real calendar. Testimonials have [brackets].	Fill gaps
AGENTIC50 podcast	Apple + Spotify. Live. Framed for 50+ learners who want AI without jargon.	No buyer/booker guest pattern yet. No LinkedIn clip cadence. Not visible on speaker or LMT pages. Episode count not public.	Restructure pattern
digitalpioneer.ai	Gallery cohort program. Oct–Dec 2026 cohorts at APL. AI-assisted digital art. Connects to hotels/venues/tourism. Grant-documented.	Not linked from main LMT or 50+TechBridge. Pioneer stories not piped to the Gallery. No outcomes packet visible for reviewers.	Connect & document
Barb (ask-barb)	Free AI assistant for 50+. No login. Plain language. Six help categories. Live on LMT.	Not positioned as a product. No B2B SKU (white-label for libraries, insurers, healthcare). No data/usage proof for grant reviewers.	Productize
Government / contracts	WIOA-eligible stated. MBE certified TX. 23 orgs. APL anchor. AACME Nexus grant. SAM/UEI status unclear.	No public capability statement. No ETPL listing confirmed. No past-performance packet. Prices conflict with ITA ranges.	Fix before next proposal

2. The model in one sentence per layer

LAYER	ONE SENTENCE	REVENUE / OUTCOME
Contracts (fuel)	Workforce boards, libraries, and aging agencies pay LMT to deliver, document, and report 50+ AI training.	Pays facilitators; grows Pioneer count; generates the proof bookers check.
AGENTIC50 (amplifier)	The podcast interviews buyers and Pioneers so bookers hear Brian weekly without a cold call.	No direct revenue now; creates the shortlist entry for national/global stages.
Stage (goal)	Brian keynotes workforce, AgeTech, HR, and policy rooms; every keynote scopes a cohort contract as the next step.	\$5k-\$15k+ fee; pipeline for contracts; global identity.
50+TechBridge (product)	Free self-paced course is the funnel; paid cohort is the contract deliverable; employer/WIOA fork is the SKU.	Contract revenue + completion certificates + WIOA reimbursements.
Digital Pioneer Gallery (proof)	Every cohort ends in a public exhibition; the gallery documents that 50+ adults create, not just consume.	Grant eligible; arts + workforce angle; tourism/venue sponsor potential.
Barb (scale)	The AI assistant that comes with the program — white-label for libraries, healthcare, and insurers who cannot run cohorts.	SaaS/license revenue; reach without Brian's hours.

Run the company by this: Contracts prove it. The podcast tells it. The stage sells it. Everything else is infrastructure.

3. What reviewers check — and your current score

WIOA boards, city grant panels, and corporate procurement officers use the same five lenses. Every gap in Section 1 maps to one of these.

CRITERION	WHAT THEY WANT TO SEE	YOU HAVE NOW	WHAT TO ADD
Past performance	Completed engagements, completion rates, org names	347 Pioneers, 23 orgs, 3x completion, APL, AACME grant	One-page past-performance sheet with dates, scope, outcomes
Capacity	Staff, facilitators, bilingual delivery, makeup path	Brian + volunteer facilitators + EN/ES claimed	Named facilitator bench; hiring/cert plan on paper
Curriculum quality	Aligned to WIOA / DOL AI literacy; measurable outcomes	6-module spine; certificates; pre/post survey (new)	Update module titles to spine; submit pre/post data after 1 cohort
Financial controls	Budget, match, MBE cert, SAM registration, ITA-range pricing	MBE TX; AACME grant budget on file; pricing inconsistent	SAM.gov + UEI active; one price list in ITA range; 10% admin cap visible
Community impact	BIPOC, underserved, documented need, partner letters	East Austin, BIPOC-majority, APL, MACC; partner letters drafted	Signed partner letters on file; Gallery Oct-Dec as documented impact

4. Platform-by-platform fixes in order

LEARNMORETECHNOLOGIES.COM — FIX THE INVOICE

- Remove three conflicting price lists. One public offer table: Pilot / Cohort / Retainer.
- Add outcomes data: confidence lift %, completion %, org names.
- Replace "from \$5,000" and "from \$1,500" with "Schedule a call — pricing matched to WIOA ITA ranges."
- Link AGENTIC50 and Gallery from the nav or footer.

50PLUSTECHBRIDGE.COM — FIX THE SPINE

- Rename modules to: Talk to AI / Don't get scammed / Stay connected / Health & independence / Money & work / Your next chapter.
- Week 1 lesson = starter prompt + 5 steps + take-home card PDF.
- After Lesson 3 gate: "Join a cohort or workforce program for Weeks 4–6."
- Add WIOA / ITA funding note on the partner page.

BRIANMCKINNEY.COM — FILL THE BRACKETS

- Replace photo placeholder with real on-stage or teaching photo.
- Replace [Name, Title, Organization] testimonials with signed releases from real buyers.
- Add a real Cal.com booking link and floor price (\$5,000 keynote).
- Add AGENTIC50 embed or link. Add Gallery as evidence.

AGENTIC50 — RUN THE BOOKING PATTERN

- Episode cadence: Pioneer → Buyer (board / library / HR / conference chair) → Peer (AgeTech leader).
- End every episode: "If you run a conference or workforce program, here is how you bring this into the room — [booking link]."
- 5 LinkedIn clips per episode. 30–45 seconds. Captions. Post Tuesday and Thursday.
- After each contract cohort: record 2 Pioneer episodes from that site.

DIGITALPIONEER.AI — CONNECT AND DOCUMENT

- Link from LMT.com and 50plustechbridge.com navs.
- After every Gallery Walk: publish 3 Pioneer profiles with photo/quote releases.
- File an outcomes one-pager per cohort (attendance, art pieces created, venue name, dates).
- Pitch hotel / venue sponsorship using the tourism-connection angle already on the site.

BARB — PRODUCTIZE ONE B2B SKU

- Name the offer: "Barb for Organizations — branded AI guide for your 50+ members or patients."
- Target: Medicare Advantage plans, hospital systems, library networks, insurers.
- Deliverable: custom-branded Barb instance + usage reporting + quarterly check-in.
- Do not build new tech first. Scope one pilot; deliver it; price the next one.

5. Government and minority contract path

HOUSEKEEPING (UNLOCK EVERYTHING ELSE)

1. SAM.gov registration + UEI active and renewed.
2. One-page capability statement: NAICS 611420 / 611430 / 624310, MBE TX, past performance, key personnel, price range.
3. ETPL listing with your local workforce board (or letter of intent from board).
4. One unified price list that falls inside standard ITA ranges.
5. Named facilitator (even one certified person) so you can say yes without being the instructor.

FIRST CONTRACTS TO CHASE (TEXAS, YOU CAN WIN)

- Workforce Solutions boards — WIOA Title I Adult / Dislocated Worker; ITA or cohort contract; scope includes one leadership briefing.
- City of Austin / Travis County — aging, digital equity, HUB set-aside procurement.
- Austin Public Library system contract (not just a room-use agreement).
- Community college adult ed WIOA Title II — enter as subcontractor first.

WRITE THESE INTO EVERY SOW

- One staff / board briefing (or keynote) — this is Brian on stage, paid by the contract.
- Outcomes report and pre/post survey data — this builds past performance.
- Optional AGENTIC50 episode with consented participants — this is the podcast story.
- Digital Pioneer Gallery Walk if cohort is 6-week community track — this is the arts/inclusion evidence.

SECOND WAVE (FUNDS THE SPEAKER STRATEGY)

- State digital-equity / broadband digital skills (NTIA-funded state plans) — partner; do not prime a large grant alone yet.
- ACL / area agencies on aging — AI + independence / scam prevention (your Week 2).
- DOL TEGL 03-25 lane — AI literacy explicitly authorized; cite the article already on LMT.com.
- Corporate DEI / workforce foundation grants (AARP Foundation, JPMorgan WorkForce, Google.org).

Do not chase: Giant federal primes with no past-performance packet. GSA Schedule before two clean local contracts. Grants that require Brian to teach every session. Anything that funds "podcasting" as the deliverable — fund training, treat the show as dissemination.

6. Speaker strategy — from Austin to global

STAGE	ROOM TYPE	WHAT GETS YOU THERE	FEE RANGE
Now	Texas workforce boards, library systems, local HR	APL relationship, AACME grant, pilot offer, AGENTIC50 clips	\$1,500–\$3,000 + travel
Next	State SHRM, national aging / workforce conferences, AgeTech summits	3 buyer podcast guests who chair those rooms; brianmckinney.com with real photo and testimonials	\$5,000–\$10,000 + travel
Global	Davos aging track, London AgeTech, WHO / UN aging sessions, AARP International	Published article / book; 1 international podcast guest; feature in aging/workforce press	\$10,000– \$25,000+

Three named talks only. Do not dilute with a fourth track until the first three are booked repeatedly.

1. "The \$76 Trillion Mistake" — economic case; best for corporate, HR, chambers.
2. "Ageism Is the Last Acceptable Bias — And AI Is Making It Worse" — policy, advocacy, aging, nonprofits.
3. "AI in One Hour" — hands-on workshop; best for library, workforce, senior center, ERG.

After every keynote, the next step is a **scoped cohort or brand briefing**. Never "I'll come back for free exposure."

7. 90-day action sequence

WEEK	ACTION	OWNER
1	SAM.gov + UEI active. Capability statement drafted.	Brian / admin
1	One unified price list. Remove \$500 keynote from public pages.	Brian
1-2	Rename 50+TechBridge modules to the six-word spine.	Brian / LMS
2	Rebuild Week 1 "Talk to AI" in the LMS (one tool, 5 steps, take-home PDF).	Brian
2	Replace photo placeholder and bracket testimonials on brianmckinney.com.	Brian
3	Book 3 buyer podcast guests (workforce board, library director, conference chair).	Brian
3	Teach one 90-minute "Talk to AI" pilot. File pre/post survey and outcomes one-pager.	Brian / facilitator
4	Submit or confirm ETPL listing with local workforce board.	Brian / admin
4-6	Two contract proposal conversations a week (board, library, city aging). Scope includes one briefing.	Brian
6	Link Gallery from LMT and 50+TechBridge navs. Publish first 3 Pioneer profiles from Oct cohort.	Brian / web
6-8	Certify or hire one facilitator. Write their name into the next proposal as Key Personnel.	Brian
8-12	First signed contract delivered with outcomes report. Use as past performance in next proposal.	Brian / facilitator
12	Scope Barb B2B pilot (one library or healthcare org). Do not build new tech; scope the existing tool.	Brian

8. Do not (this is the constraint list)

- Keep three different public price lists. One list. One booking link.
- Take a training contract that requires Brian in the room every session.
- Rebuild the LMS before the module titles are renamed.
- Open the \$27 membership before the B2B calendar is booked.
- Call Brian a global speaker while the public floor price is \$500.
- Let the Gallery remain disconnected from LMT and 50+TechBridge.
- Fund podcasting as a deliverable. Fund training; treat the show as dissemination.
- Prime a large federal grant alone before two clean local contracts are on paper.
- Use contract hours for keynote prep. Stage time pays itself; contract time pays facilitators.

One sentence for every conversation: "Brian McKinney is the AgeTech speaker on 50+ AI — host of AGENTIC50, founder of the only WIOA-eligible program workforce boards can actually buy, and the person who turned 347 Pioneers into proof." Government pays LMT to prove it. The podcast tells it. The stage sells it.
