

# 50+TechBridge | Facilitator Folder

Week 5 of 6 · Money & work · One fork per cohort

Week 5 Fork

Circle the lab you are teaching today. This is how one course becomes a library program, a WIOA program, or an employer SKU.

| LAB TODAY     |                   | SITE TYPE                                                                                                                                         | FACILITATOR |                          |
|---------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|-------------|--------------------------|
| FORK          | ROOM              | YOU DO (THE WIN)                                                                                                                                  |             | REUSE                    |
| A. Money      | Library / retired | Safer bill pay or account login practice + "I will never share a code."<br>Optional: AI explains a statement line in plain language (not advice). |             | Old banking week         |
| B. Job search | WIOA / job seeker | AI drafts a resume bullet or interview answer. They edit it. They do not paste a lie.                                                             |             | Career module on LMT.com |
| C. Workplace  | Employer          | One real task in their tool (Outlook, Teams, Excel, CRM) sped up with AI. Show a supervisor next week.                                            |             | Custom employer examples |

**Monetization:** Fork B + attendance packet = WIOA SKU. Fork C + outcomes one-pager = employer SKU. Fork A stays the community default.
