

End state: They open a portal *or* write 3 questions for a visit. They know AI is not their doctor.

REUSE

Patient portal, refill, telehealth join-link from the old course.

ADD

AI prompt: "Help me write 3 questions to ask my doctor about _____. Do not diagnose. Do not suggest I skip a visit."
Then the rule: **verify with a clinician.**

Stop box: If the AI names a diagnosis, dose, or "you don't need to see a doctor," discard it. Write that on the take-home.
