

The Lesson 2 App — what boards can include and refer

A documented instructional coach for Digital Pioneer Module 1 (Talk to AI). Barb teaches. ChatGPT is the public tool. #AGENTIC50 is the earned mark after the first win. Boards buy the program and the proof — not a senior chatbot.

WHAT THIS IS (ONE SENTENCE)

The app's job is to make the first AI practice **the same at every site** and leave a **named, dated completion record** a workforce board can file with an IEP/ISS, ETPL description, or partner referral. It started as "Talk to Barb" — a destination chatbot — because that is what a first app looks like. That is the wrong product for monetization and for reviewers. Organizations pay for **access, proof, and delivery**. Learners get a free start. The app is how Lesson 2 is delivered and documented. It is not the invoice.

NAME THE STACK — DO NOT COLLAPSE IT

LAYER	NAME	WHO SEES IT FIRST	JOB
Program	50+TechBridge Digital Pioneer	Boards, ETPL, contracts	The WIOA-eligible training they buy
Coach	Barb (HeyGen + Lesson 2 screens)	Learners in Week 1	Same voice as the video. Walks one win.
Tool	ChatGPT at chatgpt.com	Learners, then their workplace	The transferable skill. Stay logged out is fine.
Mark	#AGENTIC50 seal	After the win; boards; podcast	Earned identity. The Pioneers Podcast. Referral brand.

Logo rule: The serrated seal is a *badge*, not the Week 1 product name. Do not ask a new learner to "talk to #AGENTIC50." Show it on this packet, the completion slip, the app after Step 4, and later-week / podcast surfaces.

WHAT THE APP MUST ACCOMPLISH

#	OUTCOME	WHY A BOARD CARES
1	Every participant asks one real question in a public AI tool and can read the answer back.	Measurable skill, not "attended a talk about AI."
2	They send one follow-up: "What should I check with a real person?"	Critical evaluation of AI output — DOL AI-literacy content, not chatbot worship.
3	A completion slip is filled (name, date, site, goal, "I did this").	Something the board can include in the file and refer to another AJC.

50+TechBridge | Lesson 2 App

Ordered changes vs the current Ask Barb / agentic50+.ai landing

Current → proposed

The current app was built before the monetization model was clear. It looks like a consumer AI product. Reviewers judge efficacy by whether a 50+ participant can **do the skill on a tool they will meet at work**, and whether the board can **file proof**. Change in this order. Do not skip to a new chatbot feature.

Best application

- ✓ Standardize Lesson 2 at AJCs, libraries, employers
- ✓ License the coach + forms with the curriculum
- ✓ Attach the slip to IEP/ISS / outcomes one-pager
- ✓ Let facilitators run it without Brian in the room

Not the application

- ✗ A senior-only chatbot that replaces ChatGPT
- ✗ Health, money, or legal advice from Barb
- ✗ Selling courses to individuals through the app
- ✗ Putting \$18K / WIOA / Book a Call on Barb's face

ORDERED LIST — CHANGE THESE, IN THIS ORDER

#	CURRENT ASK BARB	CHANGE TO	WHY
1	One landing mixes learners and buyers. \$18K / MBE / WIOA sit next to "Meet Barb."	Two doors. Learner: Practice Lesson 2. Board: this packet + outcomes sheet. Hide procurement copy from Step 1.	Boards need a professional packet. Learners need a calm first screen. Mixing them makes both audiences bounce.
2	Primary CTA: "Talk to Barb Now." Barb is the destination chatbot.	Barb is the coach. Primary button: Open ChatGPT (chatgpt.com, new tab). Leave Barb's tab open.	The skill must transfer. A wrapper chatbot trains them on LMT, not on the tool employers use.
3	First topics: Health & Medications, Money, Safety.	First win = one practical task (letter, trip, recipe, or job task). Health stays in Week 4, after "verify the AI."	Week 1 medical advice is a liability and a trust killer. Boards will not refer a health bot.
4	No lesson sequence. Open-ended chat.	Five screens, in order: 0 Welcome → 1 Open the tool → 2 Ask → 3 Follow-up → 4 Save the win.	Same as the 110-minute session. Any facilitator can run it. Reviewers can walk the path.
5	No human-check step. The AI's answer is the end.	Required follow-up: "What should I check with a real person?" or "Make that shorter."	Matches DOL AI-literacy: evaluate output. This is the line boards quote.
6	No completion artifact. No name, date, or site on a slip.	Print / save Lesson 2 completion slip (next sheet in this folder).	This is what gets included. Without it the app is a demo, not a system.
7	#AGENTIC50 / agentic50+.ai used as the product name on the first click.	Seal after Step 4: "You completed Talk to AI. Welcome to #AGENTIC50." Seal on slip, packet, podcast, later weeks.	The seal is a movement and trust mark. Using it as the chatbot name confuses learners and looks like a podcast, not training.
8	No board language. Nothing an AJC can paste into a file.	Publish the include / refer blocks on page 3 of this packet.	"This or something better" only works if you define the standard.
9	No ChatGPT API — good — but the landing still implies Barb answers.	Keep no API. Do not iframe chatgpt.com. New tab only. Documented in app-lesson-02-setup.	No vendor lock-in, no surprise AI bill, no download. Boards can inspect the tool.
10	App is a side project next to the 6-week course.	License the coach with the curriculum. Train / License engines: same screens at every site; outcomes data from slips + pre/post.	This is how the app pays for itself without selling courses to 50+ individuals.

HOW THIS MAPS TO DOL AI-LITERACY CONTENT (TEGL 03-25 AUTHORIZATION)

Federal guidance authorized WIOA funds for AI literacy (foundational use, workplace context, critical evaluation, privacy, ethics). Lesson 2 is the **first measured practice** in the Digital Pioneer Core — not a substitute for the 6-week program.

DOL CONTENT AREA	WHAT HAPPENS IN THE APP	PROOF IN THE FILE
Foundational AI concepts	Barb: you are not late; Siri/Maps is a little AI; this is a conversation.	Attendance + Week 1 guide
Using AI tools in workplace / life context	They open chatgpt.com and send one real prompt (letter, trip, recipe, or job task).	Completion slip, item 1
Critical evaluation of AI outputs	Follow-up: "What should I check with a real person?"	Completion slip, item 2
Data privacy and security	Always-on line: no SSN, bank numbers, passwords. Stay logged out is fine.	Screen 1 + take-home card
Ethical use	AI is extra help, not a replacement for people. No medical or legal advice in Week 1.	Week 1 rule + Week 2 scams

COPY THIS INTO AN IEP / ISS OR CASE NOTE

Participant completed **50+TechBridge Digital Pioneer, Module 1 — Talk to AI (Lesson 2 coach)** on ____ / ____ / ____ at _____. They opened a public AI tool (ChatGPT), submitted one practical prompt related to their goal (family / health / job / work), and asked a follow-up to check the answer with a real person. Completion slip attached. Next module: Don't Get Scammed.

COPY THIS INTO AN ETPL / PROGRAM DESCRIPTION

Introductory AI literacy is practiced in a **facilitated Lesson 2 coach** (Barb) that opens a public workplace tool rather than a proprietary chatbot. Adults 50+ complete one documented prompt and one human-check follow-up. The program issues a named completion record and a pre/post confidence survey. Full Digital Pioneer Core is 6 weeks / 12 hours with a Week 5 fork for job search or workplace tools.

"THIS OR SOMETHING BETTER" — THE STANDARD YOU CAN REFER

Boards may adopt the 50+TechBridge Lesson 2 coach, **or an equivalent** that meets all four tests. If a vendor cannot meet them, it is not a substitute.

1. Teaches a **public AI tool** the participant can reopen at work or at home — not only a branded wrapper.
2. Requires a **human-check follow-up** (critical evaluation), not a single generated answer.
3. Produces a **named, dated completion record** the board can file.
4. Is designed for **adults 50+** (large type, stay-logged-out path, no account required to start, no health-bot first screen).

Referral sentence: "Use the 50+TechBridge Lesson 2 coach, or another tool that meets the four-test AI-literacy practice standard in the 50+TechBridge board packet." Other boards can include that sentence. LMT is the reference implementation.

50+TechBridge | How to run it

Screens, #AGENTIC50 placement, and how the app serves the five engines

How

LEARNER SCREENS (IN ORDER)

#	SCREEN	THEY LEAVE ABLE TO...	SEAL?
0	Welcome — “This is for me.” Pick family / health / job / work.	Name one goal. No WIOA copy.	Tiny footer only, if at all
1	Open the tool — Barb photo. Button: Open ChatGPT.	See the ChatGPT box. Stay logged out. Safety line visible.	No
2	Ask — starter prompt to copy. Their real question next.	One prompt sent.	No
3	Follow-up — shorter, or check with a real person.	They judged the answer.	No
4	Save the win — take-home + completion slip.	Paper in the bag. Next: Don’t get scammed.	Yes — earned

Step 4 line (say this): “You asked a real question and you checked the answer. That is the skill. You are a Digital Pioneer. This mark is #AGENTIC50 — the community and The Pioneers Podcast. Keep the slip. Your board or library can file a copy.”

HOW THE APP SERVES MONETIZATION (FIVE ENGINES)

ENGINE	APP’S JOB	WHAT YOU SELL
Speak	Live demo of screens 1–4 in under 8 minutes. Hand this packet.	Keynote that ends in a pilot or license, not applause.
License	The missing SKU: annual site access to the coach, slips, and outcomes fields.	Curriculum + app + reporting — not a one-off workshop.
Train	Any facilitator runs the same Lesson 2. WIOA is a funding path, not a discount.	Cohort / ITA package with documented completions.
Advise	Do not put brand-advisory CTAs on the learner app.	Brand Fluency stays a separate retainer.
Certify	Paid facilitators teach from these screens. Seal on their certificate.	Delivery outside Central Texas without cloning Brian.

How to finish this (founder): You do not need a new AI product. You need the current landing to stop being a chatbot and start being Lesson 2 plus a slip. Build changes 1–7 on the live Ask Barb / agentic50+.ai site. Print this packet and the completion slip for every board meeting. That is the app, gotten right.

Setup (no API, no download): Working screens: talk-to-ai/index.html. Build recipe: app-how-to-build.html. Button = <https://chatgpt.com> · new tab · do not iframe · do not add an OpenAI key.

WHAT TO ATTACH IN A REVIEW FOLDER

☐ This 4-page packet ☐ Lesson 2 completion slip (sample + one filled) ☐ Week 1 take-home card ☐ Pre/post survey ☐ Outcomes one-pager ☐ Sign-in totals
