

ABOUT LEARN MORE TECHNOLOGIES

We Exist So Adults 50+ Are Never Left Behind

Learn More Technologies LLC, operating as 50+TechBridge, is an Austin-based education organization that treats digital independence as a right — not a privilege.

PURPOSE STATEMENT

Why We Exist

Learn More Technologies exists so adults 50 and older can live, work, create, and connect in a digital world without being left behind. We exist to prove that age is not a barrier to technology — it is an asset — and that digital independence is a right, not a privilege reserved for the already fluent.

Too many capable people are locked out of AI, online services, creative tools, and economic opportunity because training was never designed for them. We

built 50+TechBridge to close that gap in the places adults already gather: public libraries, senior centers, and cultural sites — free, in their language, at their pace, with instructors who respect their intelligence.

MISSION STATEMENT

What We Do

Our mission is to close the digital divide for adults 50+ through free, hands-on AI and technology education delivered in community — so overlooked talent can create, stay safe online, remain employable, and participate fully in civic and cultural life.

We operate 50+TechBridge as that mission in practice: live workshops, bilingual English and Spanish materials, a creative-output model where participants make real work, and a methodology grounded in dignity, accessibility, and community. Participants are Digital Pioneers — not beginners to be talked down to.

What Guides the Work

Dignity

No participant should feel embarrassed for not knowing something. Instruction is patient, respectful, and built for adult intelligence — never for a stereotype of age.

Accessibility

Programming is free, offered in English and Spanish, and delivered at neighborhood locations people already trust. Cost, transportation, and jargon should not be the barrier.

Community

Technology education is most powerful when it happens together. We teach in libraries and cultural centers, and we treat lived experience as an asset AI can amplify — not replace.

Use these versions on grant forms, partner letters, and bios. They describe Learn More Technologies, not only the 50+TechBridge program name. Download the one-page PDF: [Learn-More-Technologies-Mission-Statement.pdf](#) · [HTML print sheet](#).

ONE SENTENCE

Learn More Technologies exists to make digital independence a right for adults 50+ — not a privilege for the already fluent.

PURPOSE (SHORT)

Learn More Technologies exists so adults 50 and older can live, work, create, and connect in a digital world without being left behind.

MISSION (SHORT)

We close the digital divide for adults 50+ through free, community-embedded AI and technology education that honors lived experience and builds real independence.

ORGANIZATION IDENTIFIER

Learn More Technologies LLC (dba 50+TechBridge) is an Austin, Texas education organization — MBE-certified, WIOA-eligible, and a

City of Austin Nexus Grant recipient — dedicated to AI literacy and digital skills for adults 50+.
