The problem: Ageism costs the U.S. economy **\$850 billion** a year (AARP & Oxford Economics). The cost sits at **\$18K per worker** (LSE & Protiviti). Adults 50+ are being left behind in the AI economy. **Approved footprint:** 9 in-person locations in central Texas — 6 Austin Public Library branches, AARP-affiliated senior centers, and the Foundation Communities veterans program. WIOA-eligible. MBE-certified. **The Pioneer Model turns that footprint into a business.**

HOW IT WORKS

WHO PAYS — AND FOR WHAT

The one sentence: Brian McKinney is the AgeTech speaker on 50+ AI — host of AGENTIC50, founder of the WIOA-eligible, MBE-certified program delivered at 9 in-person locations in central Texas. Government pays LMT to prove it. The podcast tells it. The stage sells it.
